## Viticulture & Winemaking

Certified organic since 2019.

In the cellar, all grapes are 100% destemmed and fermented in traditional lined cement vats using only indigenous yeasts. Fermentation temperatures are allowed to rise naturally to 33–34°C, and pigeage is done by foot to optimize color and tannin extraction. After 2 weeks on the skins, the young wines are drawn off, and selected press wine is blended back to enhance structure. Malolactic conversion occurs either in cask or sealed vats, depending on the cuvée. Aging lasts 18–24 months in barrels, with 50% new oak for premier and grand cru sites, and 25–33% for village wines. The wines are bottled without fining or filtration, preserving purity, texture, and the characteristic depth and finesse of Lignier wines.
